

The Fisher Bing!

1 Bing and Bong were going fishing on the Planet of Technology. But these were different to normal fish. Technology fish were made of metal!

2 Bing and Bong found the fishing hole. Oh no! It had a big metal lid covering it. Bing tried to lift it up.

3 Bing pulled and pulled and pulled. But the lid was just too heavy. What were they going to do?

4 Bong found something that might help. It was a rope with a giant magnet on the end and it was stuck to the lid.

5 The rope had a platform at the other end. Bong and a helpful Flocker jumped onto the platform, but nothing happened.

6 Then Bong jumped onto the platform. Can you guess what happened? Their weight pulled the magnet and off came the lid.

7 Now Bing and Bong could do some fishing. Their fishing rods had magnets on the end so they could catch the metal fish.

8 Bing and Bong stood at the edge of the pool and put their fishing rods in the water. “Ahhh!” squealed Bong, already catching a fish.

9 Bing hadn’t caught anything. “Hmmm!” sighed Bing. Fishing wasn’t as easy as it looked. Bing put the rod back into the water again.

10 Just then, Bong felt another fish tugging on the line! Bong pulled hard but nothing happened. Why wouldn’t the fish come out?

11 Bing peered into the water to see what was going on. Wow! Bing was amazed. This fish was smooth and shiny and very BIG!

12 Bing and Bong pulled on the fishing line together. Bit by bit the fish came out of the water but... SPLOSH! It was just too heavy.

13 Bing remembered the big magnet and how they'd used it to lift the lid. Bing lowered the magnet into the water.

14 But the fish was too heavy and it pulled Bing high into the air. On no! How would poor Bing get down now?

15 Bong soon worked out what was wrong. Bing wasn't heavy enough and they needed more weight to help pull the rope.

16 Bong and the two helpful Flockers joined in. They held the rope and pulled as hard as they could and... up came the fish!

17 Bing fastened the rope so they wouldn't lose the fish again. Now it was time to take a photo. Everyone smiled. CLICK!

18 Bing's watch beeped. Time to go home. They put the metal fish back in the water and the big one made a SPLASH! Goodbye!
